

Craft Stick Puzzle

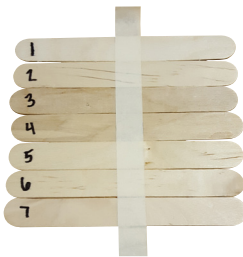

Materials

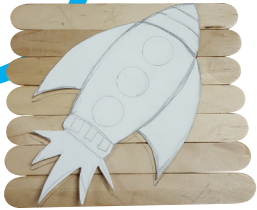

- Rocket Template (optional)
- Creativity Street® Jumbo Craft Sticks
- Scissors
- 7/8" to 1" Circle Stencil (nickel, penny, etc.)
- Tempera Paint
- Creativity Street® Paint Brush
- Creativity Street® Glitter Glue or Spectra® Glitter
- Creativity Street® Masking Tape

Steps:

1. Print out the rocket template (if desired) and cut along the black outline.
2. Line up 7 Jumbo Craft Sticks so that they are tight together and vertical. Tape the backside all the way across so that they stay in place while you paint and decorate your puzzle.
3. Label the back of each stick numbers 1 through 7 so that you know the order of your puzzle.

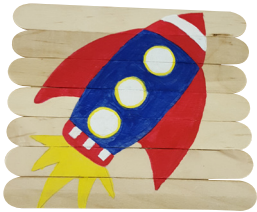

4. Trace template on the front of craft sticks with a pencil. Use a circle stencil like a nickel or other coin to trace the windows of the rocket. Add any details you would like to your rocket. Alternatively, create your own design.

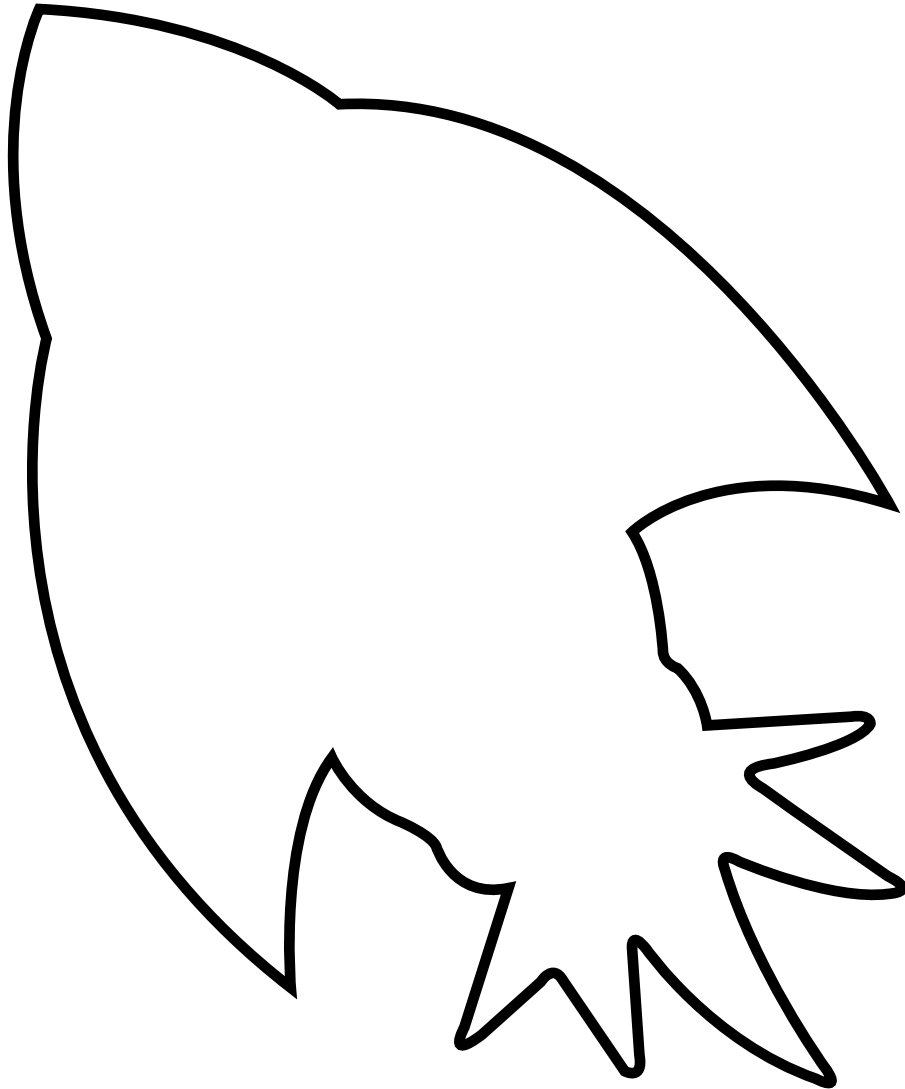

5. Paint with colors of your choice, and use glitter to add accents, such as on the fire and windows of the rocket.

6. Let dry and remove tape.
